

SAVERNAKE DENTAL
LABORATORY GROUP

Job title	Diagnostics Dental Laboratory Technician
Department/Section	Technical
Role overview	<p><i>An opportunity has arisen for a Lab Assistant within a large private, full service laboratory in the diagnostic and prototyping department. This role involves working with team members from all departments to plan treatments and offer high quality diagnostic outcomes for clients and patients. Further to diagnostics there will be creation of prototypes, implant planning and the manufacture of definitive appliances where necessary.</i></p> <p><i>The role is ideally suited to someone with experience in waxing detailed morphology and with an understanding of occlusion and anatomy. A background in using acrylic, resins and composite materials would also be beneficial. However, there is support and training available to the right candidate with less experience.</i></p> <p><i>In-lab training of the various materials and processes will take place on site at Thatcham Dental Laboratory where needed.</i></p>
Key responsibilities	<ul style="list-style-type: none">• <i>Diagnostic waxing to a high standard of morphology and finish.</i>• <i>An understanding of occlusion ideal but support can be given</i>• <i>Skilled with Acrylic and Composite for temporary, diagnostic definitive cases</i>• <i>Experience in stents and splints Ideal but training and support will be given.</i>• <i>Experience in digital workflows helpful but not necessary.</i>
Key skills required	<ul style="list-style-type: none">• <i>Attention to detail</i>• <i>Creative flair</i>• <i>Problem solving skills</i>• <i>Presentation skills</i>• <i>Willingness to learn</i>• <i>Team working</i>

	<ul style="list-style-type: none">• Initiative
